Linkedin: <https://rs.linkedin.com/in/pavle-paunovic-96244282>

Education:

- Technical College Of Vocational Studies - Kragujevac
 - Qualification : Bachelor of Applied Science (B.A.Sc.) in Informatics/Computer Science
-

Work Experience/Commercial Projects:

CUBE Team – **Front End Developer**

- Created dust off, the tool in Node.js that shows all the git files that are not touched for the long period of time
- Analyzed whole project code and fixed it according to style guide.
- Worked in team of 4 people by utilizing **mob programming** concept.
We are working on www.company.guru, big single page web application. We fixed bugs implemented new features, and done many tasks and stories together. Mob programming is, one person program for 10 minutes while other persons in team tells him what to program. We would switch every 10 minutes.
- Doing QA after finishing the task, by testing git branch in every browser.
- Occasionally working remote.
- Working independently on given tasks.
- **Constantly meeting deadlines and delivering production level code.**
- Converted whole project from TypeScript to JavaScript.

Technologies used: HTML5, SCSS, Vue.js, Vuex, JSX, TypeScript, Node.js, Git, BitBucket, Asana, Confluence, Slack

October 2017 – Current

Cosmic Development – **Front End Developer**

- Worked on Renter App in the team of 3 developers, web application which manage deals and housing by real estate agents. Which worker is assigned to what task, what leasing exists etc. My assignments were building Interface of application with Angular.
Beside that I practiced converting PNG to HTML5/CSS3

Technologies used: HTML5, SCSS, Angular 1, Gulp, Bower, Node.js, BitBucket

April 2016 – August 2016

Bakson LTD – **Front End Developer/Full Stack JavaScript Developer – Internship**

- Created Bakson HR, web application that manage employee vacation. Before building web application, employee vacation management was done in Excel. HR colleagues were very satisfied by this web application.
- Improved DevOpsTool, web application that follow progress of dev teams by fetching data from JIRA. I refactored whole code and implemented new features and tested all with Jasmine.js
- Worked on Technical Strategy, web application that show tasks that are assigned to Software Architects, what project they are assigned to, what projects are completed etc.
- On all three applications I worked in team with UI Designer and Senior Software Developer.

Technologies used: HTML5, SCSS, JavaScript, Angular 1, Jasmine.js, Node.js, Express.js, MongoDB, Grunt, Bower, Git

August 2015 – November 2015

Personal Projects:

Note: All my personal projects can be run on my website https://v381.github.io/Pavle_Paunovic/. They are built from period 2014-2017

- **Calendar**
 - Fully functional calendar in vanilla JavaScript.
 - **Music Trainer**
 - Goal of this web app is to teach you music notes. Only requirement is to know basic (CDEFGAB) on your chosen instrument. Clicking on New Note or pressing space button will show note randomly on music staff. You can guess note either by using keyboard or by clicking
 - **Slide Puzzle**
 - Slide puzzle game written in TypeScript. Solve it in less moves as possible. When the number is green, that means the number is in right position. Move pieces next to '-' box/piece.
 - **Hangman**
 - Hangman game written in TypeScript. There are more than 600 words to guess and its responsive designed.
 - **Guitar Fretboard Note Trainer**
 - Web application which helps to memorize notes on guitar fretboard, written in TypeScript
 - **Piano Note Trainer**
 - Web application which helps to memorize notes on piano, written in TypeScript
 - **Song Transcriber**
 - Web application which changes tempo of the song so musician can easily learn it
-

Programming skills(and technologies used on personal projects)

- HTML5, CSS3 (+ SCSS, Bootstrap, BEM)
 - JavaScript(+ ES6)
 - TypeScript
 - Angular 1, Angular 4 (Basic knowledge, made one web application with it)
 - Backbone.js
 - Express.js, Bower, Gulp, Npm, MongoDB (+ Basic CRUD with Node)
 - Vue.js, Vuex, JSX, Yarn
-

Other Skills:

- English Language – Intermediate Level
- **Good at mentoring people – Part time guitar teacher**
